BAKSHAM AKASH REDDY

+91 8790401013 • akashreddy798695143@gmail.com • Andhra Pradesh, India • LinkedIn • GitHub • Portfolio

TECHNICAL SKILLS

Languages:	Java (Core & OOPs), Python, JavaScript (ES6+), TypeScript, SQL
Core CS Concepts:	Data Structures & Algorithms (DSA), OOPs, DBMS, Operating Systems, Computer Networks
Web Technologies:	Next.js, React.js, Node.js, Express.js, Tailwind CSS, RESTful APIs, WebSockets
Databases & Tools:	PostgreSQL, Prisma ORM, MongoDB, MySQL, Git, GitHub, Docker, Postman, Linux

TECHNICAL PROJECTS

ResourceFlow AI – Autonomous Emergency Dispatch System | Live Demo 09/2026

Next.js, TypeScript, Python, PostgreSQL, Prisma ORM, Gemini API, Twilio API, REST APIs

- Architected an automated disaster response engine that processes multi-source emergency incident alerts with **< 1.2s dispatch latency**.
- Engineered structured triage algorithms and integrated Gemini AI to categorize incident urgency, reducing coordination overhead by **40%**.
- Constructed relational data pipelines using Prisma with PostgreSQL to persist crisis resources, audit logs, and verified operational state changes.
- Built high-reliability notification workflows executing automated real-time SMS and WhatsApp broadcast dispatches via Twilio webhooks.

Full Stack Scalable E-Commerce Platform | Live Demo 07/2025 – Present

React.js, Node.js, Express.js, MongoDB, PostgreSQL, JWT, RESTful Architecture

- Developed complete end-to-end e-commerce platform using modular MVC pattern with decoupled client-server architecture.
- Implemented secure token-based authentication (JWT) and role-based access control (RBAC) across customer, vendor, and admin endpoints.
- Designed indexed database schemas and optimized aggregation pipelines, achieving an estimated **35% reduction** in database read latency.
- Formulated resilient order checkout and inventory management APIs ensuring data consistency and atomic state updates under simulated concurrent loads.

AI Nutrition & Health Analytics Assistant 02/2026

React.js, Node.js, Express.js, REST APIs, Context API

- Built a personalized dietary recommendation web application parsing nutritional goals and calculating tailored macro-nutrient distributions.
- Designed reactive UI dashboards in React.js integrated with centralized client state management, ensuring sub-100ms UI interaction responsiveness.

TECHNICAL EXPERIENCE & INTERNSHIPS

Agentic AI Intern – Brain O Vision 05/2026 – 06/2026 | Virtual

- Researched and implemented autonomous AI agent workflows leveraging Python and modular task execution pipelines.
- Automated multi-step reasoning routines and structured output validation to streamline backend data extraction flows.

Generative AI Intern – SmartBridge (Google Cloud) 06/2026 – 08/2026 | Virtual

- Built interactive cloud-connected prototypes integrating foundation models and modern web frontends using JavaScript and React.js.
- Collaborated on software lifecycle tasks, adhering to strict version control (Git) conventions and agile development practices.

Web Development Intern – Cognifyz Technologies 03/2026 – 04/2026 | Virtual

- Implemented reusable, mobile-first responsive web components ensuring cross-browser standard compliance and fast DOM rendering.

EDUCATION

Annamacharya Institute of Technology and Sciences, Tirupati	**2023 · 2027**
Bachelor of Technology · Electronics and Communication Engineering	**CGPA: 7.0 / 10 (75%)**
Sri Sudha Junior College, Dhone	**2021 · 2023**
Board of Intermediate Education (MPC)	**Score: 81.1%**
Z.P.H.S School	**Passed out: 2022**
Secondary School Certificate (SSC)	**Score: 85%**

CERTIFICATIONS

- **Introduction to Agentic AI · Microsoft**
- **Google Cloud Generative AI Certificate · SmartBridge**
- **Full-Stack Web Development Bootcamp · Udemy**
